

GREEN HOUSE DESIGN

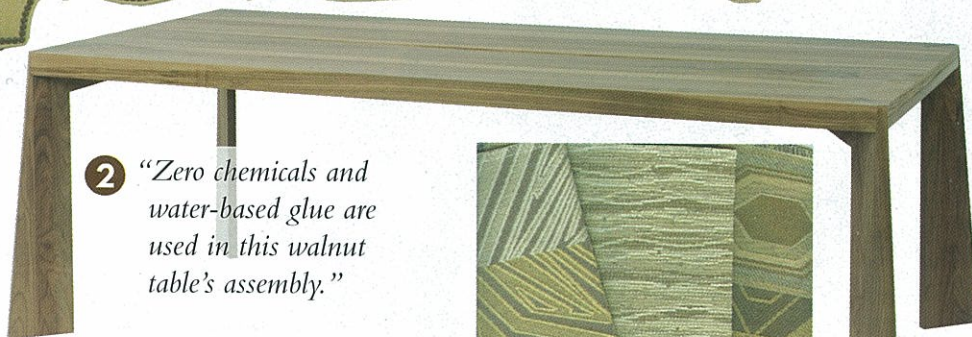

1

"All sofa upholstery is available with sustainable wood frames and soy padding in timeless designs."

BARRY DIXON, head of the design committee for the CharityWorks GreenHouse, selects eco-friendly furniture for the McLean-based carbon-neutral house, the very first to be built on the East Coast. Using low-impact, recycled interior decor will help all homeowners reduce their carbon footprint.

2

"Zero chemicals and water-based glue are used in this walnut table's assembly."

3

"Made from society's 'throwaways,' these fabrics have texture, panache, and longevity!"

4 *"Siematic kitchens meet all Euro-standards (more stringent than those in the U.S.) for environmentally-friendly products."*

5

"The Megerian collection is 100 percent organic wool with natural non-toxic dyes."

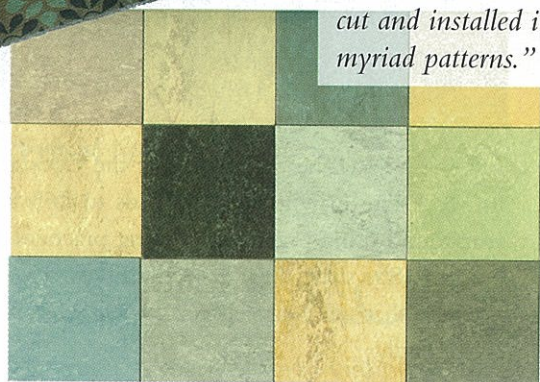

6

"Farrow & Ball's new eco-friendly paints have all my favorite tones."

7

"Linoleum tiles, made of totally natural linseed oil, can be cut and installed in myriad patterns."

1. Alan sofa, Barry Dixon Furniture by Tomlinson Erwin-Lambeth (Price available upon request); J. Lambeth, Washington Design Center, 300 D St. SW, 202-646-1774, www.jlambeth.com. 2.
